Fittings, Tubing & Pipe

Tube & Pipe

We carry tube and pipe in the following configurations:

Tube

- 304 or 316 stainless steel
- Common diameters of 1, 2, 3, 4, 6, 8, 10 and 12 inches
- Wall thickness of .065, .083 and .109
- 20' lengths
- Can be cut to order
- Polished or unpolished

Pipe

- 304 or 316 stainless steel
- Schedule 5, 10, 40 and 80
- 20' lengths
- Can be cut to order
- Standard or seamless

Tubing & Pipe

Tube & Pipe Branching

Our capabilities include branching tube and/or pipe using a cold forming pulling process. Using one machine, we pull ports to size that are ready for welding.

- Most effective method for tubing fabrication
- Significantly reduces number of joints in a pipe run
- Lowers material costs
- Reduces fabrication time
- Limits material handling
- Nearly limitless orientation and location options
- Limits thermal fatigue of materials
- Ideal for most malleable materials including stainless steel, carbon steel, copper, copper-nickel and aluminum alloys.

Tube & Pipe Branching

Koss Road Crew

In addition to equipment and system installations, our Road Crew provides piping services to the cheese, food, beverage and other sanitary industries.

- Utility piping
- Process piping
- Emergency piping
